

Preface

The *Majestic Journal of Pharmacology and Toxicology* is an international open-access journal that publishes rigorously designed, ethically conducted research across the full spectrum of pharmacological and toxicological sciences. The journal welcomes high-quality original research articles, reviews, and methodological advances that address fundamental and translational aspects of drug discovery, development, evaluation, and safety.

The scope of the journal integrates a broad range of advanced research areas, including molecular and cellular mechanisms of drug action, pharmacokinetics and pharmacodynamics, signal transduction, systemic toxicology, organ-specific toxic responses, safety and risk assessment, biomarker identification, and emerging experimental and systems-based methodologies. In recognition of the importance of translational and regenerative Pharmacological sciences, particular emphasis is placed on studies that bridge experimental findings with experimental, regulatory, and clinical applications.

The journal actively promotes cross-disciplinary collaboration by providing a platform for meaningful exchange among researchers from academia, the pharmaceutical and biotechnology industries, and regulatory and public health institutions. Based on this collaborative approach, the journal aims to support scientific accuracy, transparency, reproducibility, and adherence to the highest ethical standards in research and publication. Beyond advancing scientific knowledge, the *Majestic Journal of Pharmacology and Toxicology* is committed to publishing work that has a tangible impact on human health and safety.

The Journal's editorial board comprises distinguished scientists from around the world whose expertise, dedication, and commitment to excellence are fundamental to maintaining the quality and integrity of the journal. All the manuscripts submitted are subject to a stringent peer review to ensure clarity and high-quality pharmacology research. The aim is to ensure that published articles meet the highest standards of scientific validity and relevance. The authors have the privilege of fast-track publication and can read their published articles online as soon as accepted. Our journal welcomes scientists and scholars to submit their high-quality, advanced research.
